

UNIVERSAL RACK MOUNT TRAYS

For Mounting ICT Power Products in 19 Inch Equipment Racks

ICT Universal Rackmount Trays allow for the mounting of single or multiple ICT power supplies, converters, or inverters in a 19 inch rack. Heavy duty powder coated steel construction provides strength and long lasting durability. Fasteners for all types of ICT products are included in the box.

The flexible design of these trays allows various combinations of ICT products to be mounted in the same rack tray simultaneously, saving valuable rack space at your site. They can also be used as a standard utility shelf that can accommodate other components at the site.

ICT-RM1U

ICT-RM2U

Model Number	Rack Height	Fits Product Families	Max. Products per Tray
ICT-RM1U	1RU	Site Inverter 300 ^(a)	3
		IntelliCharge Series ^(a)	2
